2	Modern Requirements4DevOps 2025 -Patch 1 Release notes added	Norina Kanwal	Hira Sharif	16-Sept-2025

1. Introduction

This document contains the notes for the 2025 release of Modern Requirements4DevOps (MR4DevOps). It describes the key features and enhancements of each module in the Modern Requirements4DevOps application. This includes Version Package, Copilot4DevOps, Smart Docs, Smart Note, FAQ, Diagram, Mock-up, Use Case, Review Management, Trace Analysis, Baseline, Reporting, Smart Reporting, and Impact Analysis.

2. Application setup

Refer to the "Modern Requirements4DevOps Installation Guide.docx" for installing the application.

Modern Requirements4DevOps 2025 - Patch 3

5

General

Bug fixes

1. Fixed an issue that allowed users who were not project administrators to edit Modern Requirements permission settings within an Azure DevOps project.
2. Fixed an issue where "whats new" was appearing blank on Modern Requirements browse page even when Copilot was not installed and disabled on Admin panel.
3. Fixed an issue where continue as stakeholder was not working when all the floating seats were reversed.

Smart Docs

Bug fixes

1. Fixed an issue where document pwrproperties were missing in "Save as PDF" when generated from toolbar option.

Review

Bug fixes

1. Fixed an issue where CSS was appearing when pasting a comment in the Response or All Comment tab.
2. Fixed an issue where review files were not displayed in the closed review node when the feedback work item included a "/" symbol.
3. Fixed an issue where users were unable to open review files when the filename contains an '&' character.

Modern Requirements4DevOps 2025 - Patch 2

5

General

Bug fixes

4. Fixed an issue where Azure DevOps groups within the Azure DevOps Project/collection administrators group were not able to access all the admin panel features.

Smart Docs

Bug fixes

2. Fixed an issue where readonly fields can be edited in edit workitem when value was empty.
3. Fixed an issue where Date/Time format was automatically selected in cloned files even when no format was selected in the original file.
4. Fixed an issue where users were unable to find 5000 work items through a search query (tree of work items).
5. Fixed an issue where Save as Word/PDF performance was degraded in the previous builds on the files having large work items count.

Version Package

Bug fixes

1. Fixed an issue where review creation for a version package failed when it contained bulk work items.

Review

Bug fixes

4. Fixed an issue where thr HTML data was appearing in the title field when performing the "Compare to" version.

Trace Analysis

Bug fixes

1. Fixed an issue where newly added test plan from the test hub were not fetched on test case result filter dialog after refresh from the grid.

Reporting

Bug fixes

1. Fixed an issue where continuous loading was appearing when clicking on insert smart parts after oprininga work item from ID hyperlink.

Modern Requirements4DevOps 2025 - Patch 1

s

General

Bug fixes

1. Fixed an issue where settings were not retained after refresh on the admin panel→General tab.
2. Fixed an issue where folder name does not properly align with other folders if no file exist under a folder.

Smart Docs

Bug fixes

1. Fixed an issue where Copilot4DevOps failed to load when invoked from Smart Docs.

Smart Report

Bug fixes

1. Fixed an issue where Bug / Steps run work items does not appear in the report as per defined in 'Report parts' when generated from TestHub/Query/smartdoc.
2. Fixed an issue where Steps IDs / Action sequence appears to be inaccurate when generate report from TestHub/Query/Smartdoc.
3. Fixed an issue where pre-defined stylesheets were missing in the style sheet dropdown on clicking on another smart part.
4. Fixed an issue where multiple data of Test Results / Test Step Run against test case does not appears when generate report from Smart Docs Test API.

Baseline

Bug fixes

1. Fixed an issue where 'Description' field value was not showing in the difference report on editing the description field.
2. Fixed an issue where work items ID, Type, Title, Ver-ID, Comp-Ver ID and Comp. Status columns were showing null on applying sorting.
3. Fixed an issue where image was not showing in the baseline details tab after creating the baseline.

Appendix A: Hardware Requirements for Redis

According to Modern Requirements4DevOps, approximate memory usage per user is 477.8495 KB (0.4666 MB). Maximum hard drive space required is $1.5 * (\text{memory size})$. For instance, in case of an 8 GB RAM, the maximum hard drive space occupied by Redis would be 12 GB.
